PROJECT: Lamps Dictionary

Jan 2016 – April 2016.

(Main and Mini)

3 months

It is the best offline Android app for English language reference, education, and vocabulary building. We can search word meaning, antonyms, synonyms and bookmark the words for quick review which is a special feature.

It was developed on **Android Studio 2.1.1 environment - Ice-Cream Sandwich 4.0 version** using **Java** and **SQLite** as front end and backend languages respectively.

PROJECT: Chat Application

July 2017 – Sept 2017.

(Mini)

3 months

Enables users to chat easily and share ideas. Includes voice commenting based on category or topics being exchanged.

It was developed using **C# .NET on Visual Studio IDE 2015** with **SQL SERVER 2010** as backend

PROJECT: Church Management System

Jan 2018 – March 2017.

(Main)

3 months

Church Management System encompasses church management services all in a single platform for easy administration and communication. The application is debuted to give ministries access to emerging technology to be more effective and efficient in reaching out to more people, thus expanding the kingdom.

It includes management of multiple Diocese, Parishes under multiple Dioceses and individual parishes' administrative activities.

It is being developed using **C# .NET on Visual Studio IDE 2017** with **SQL SERVER 2014** as backend. It is a **3-tier Architecture.**
